Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. The response filed November 24, 2004 is acknowledged.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

3. Claims 2 and 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Blatt (3,811,622).

Blatt discloses an intercept valve comprising: a main body 11; a ball obturator 25; an annular seating 23; a pusher element 47; a means for activating 39.

Allowable Subject Matter

4. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments filed November 24, 2004 have been fully considered but they are not persuasive.

Applicant argues that Blatt does not show a pusher element arranged in contact with a surface zone of the ball obturator comprised between a diametrically intersecting plane of the ball obturator, perpendicular to the central axis of the annular seating, and the annular seating, but only show a pusher element (47) engaged on a surface zone disposed downstream the annular seating when the valve is in the closed condition. Applicant's argument, while true for the closed position, is not true when the ball obturator 25 is in the open position. As shown in dashed line, Blatt shows the pusher element in contact with the ball obturator surface in the area between the diametrically intersecting plane perpendicular to the central axis of the annular seating and the annular seating.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
